

Possible Ways of Constructing Log Cabin

All Log Cabins in the Avon® Grande Storage Range can be constructed with the windows along either the left or right wall. The internal double door will need to be cut into the cabin, allowing you to place it wherever best suits your needs. The partition wall can be placed inside the cabin anywhere between its front and back walls, (minimum width depends on window and door positions). The single solid door can be cut into either the back wall, side walls, or into the partition wall.
